Evacuation Chair Servicing

At Evacusafe, our professionally qualified engineers, equipped with an in-depth understanding of manufacturing evacuation chairs, swiftly identify and address potential issues, ensuring your equipment's safety and reliability.

Choose our experienced engineers for nationwide equipment maintenance, ensuring optimal working condition and readiness for emergencies.

Receive a detailed certification report post-service for your product records.

Why do the Chairs Need Servicing?

Servicing ensures that your chair/s will be in pristine working order if the time comes when they are required. It is paramount that an annual service takes place and there are now government guidelines available in the form of PUWER Regulations.

The structure of the chair will be checked to ensure it is intact. The battery cells should be replaced every two years to ensure the reliability of the equipment. We can arrange professional expert servicing for your equipment to assist you in meeting your requirements with the PUWER Regulations

How often should evacuation chairs be serviced?

We recommend regular visual inspections of the evacuation chairs to check for any signs of wear and tear, damage, or malfunction. As a guideline, all emergency escape equipment be inspected and serviced annually.

Do Evacusafe service other brand's equipment?

We service not only Evacusafe equipment but also other brands. Whether it's a tracked chair, transit/ ambulance chair, powered stair climber, or a ski pad/slide, we have the expertise to meet your service and maintenance needs.

Where should evacuation chairs be serviced?

Our qualified engineers can conduct on-site servicing for your convenience.
